SUMMER RESIDENCES.

COPYRIGHT, 1907, BY SAMPSON & MURDOCK CO.

(See also List of Summer Residents)

GIVING the location of the Streets, Places, Parks, Squares, etc., and showing what other streets and places run from them, or across them, with the number at which they intersect

From this list, the location of any number on a street, or the location of any public building, can be easily ascertained; as, for instance, wishing to know at what part of Broadway No. 220 is located, you look at Broadway, and find that Gould Street runs from 202, and Park Street from 226, showing that 220 would come on the left, between Gould and Park Streets

When a street crosses another, numbers (or ciphers) are given on both sides; but when it begins or ends at that street, the number is given only on the side at which it intersects. Ciphers are used where no numbers exist.

Read what the publishers of the Boston Directory say about Monotype Quality and Product

"Gentlemen:—The product of the Monotype in our office exceeds our expectations, and more than makes good your promises.

"In the two weeks ending March 23, after making all corrections, the net average for each machine per hour for the entire time was a little over 4600 ems. The matter was 6, 8 and 10 point, mainly 6 point.

"Repairs have been trifling and the quality of the work has been entirely satisfactory.

"We anticipated having to procure additional Keyboards and to run the Casters nights in order to do our work, but are much gratified to believe that neither will be necessary.

"We are just commencing on a large output of 5½ point matter upon which our machinist is confident the above record will be exceeded.

"We should not fully express our satisfaction did we not say to you that the manner in which your Boston representative has cared for our mutual interests is most highly appreciated by us.

"Very truly yours,

"Sampson & Murdock Co."
